

1. Read this document [https://snakify.org/en/lessons/two\\_dimensional\\_lists\\_arrays/](https://snakify.org/en/lessons/two_dimensional_lists_arrays/) and then try to solve the problem below.
2. Write a Python program which takes two digits  $m$  (row) and  $n$  (column) as input and generates a two-dimensional array. The element value in the  $i$ -th row and  $j$ -th column of the array should be  $i*j$ .
