Q1. Explain all 4 principles of OOP.

Q2. Design a BookmyShow like program where users can book a ticket.
Try to make as many classes you feel there should exist. And apply all the principles of oops we covered in class.

For Eg:-
Your Balance: 1000

Shows Available
1. ABC
2. BEK

Press the no. to get more info for the show.
<user pressed 1>
ABC
Cast: give random cast
Budget: give random budget
Rating: give random rating
Price for ticket - 200

New Balance: 800
